The brand new **CAT Carbon Cranks** have been tested to be as strong as the top-of-the-line DuraAce cranks, but - true to CAT's tradition of producing not only high quality bikes and components but also super weight savings too - our cranks are only 60% the weight of DuraAce cranks.

They are currently for the standard Ultegra square-type bottom bracket and are available in the **sizes 172.5 and 175** (cranks for DuraAce type bottom brackets as well as sizes 170 and 177 are planned). Please note that these are currently not suitable for Campagnolo type axles.

These sleek, strong carbon cranks are a true enhancement for any bike and they are only available direct from us.

**Weight:** 290g per pair

**Sizes currently available:** 172.5 and 175

**Bottom bracket attachment type:** Standard square (Shimano Ultegra) type only

**Price:** 750 Swiss Francs per pair, plus postage if ordered separately  
500 Swiss Francs per pair if ordered with a Cat Cheetah
